GENERAL REMARKS: A joint inspection was conducted at the facility with Bob Stone (USEPA) and Dave Spencer and myself (IEPA). The purpose of the inspection was to familiarize Bob Stone with the site's layout, operational procedures, storage capacity in comparison to the site's Part B Application, which was called in on Feb 15, 1982. Bob Stone stressed to V. Messer that the drums storage area would NEVER be permitted if the condition that existed at this time. - were normal practice. He stated that the site should

INTERVIEW: Refuse to accept drums that were in poor condition and/or leaking. Five drums needed to be protected from the weather, the buffer zone requirement, impermeable base, as well as any states requirements (i.e. storage of containers to be 2 high only) would have to be met prior to issuance of any permit. The drums storage yard were being moved around as the end of the month the inventory could be taken, but we were able to get a rough estimation of 510 drums, still stacked

DIAGRAM: 3 high in places, with many in poor condition, & some leaking.
